CAGE BIRDS

BREEDING SEASON: VITAMIN SUPPLEMENT FOR CAGE BIRDS (i.e. CANARIES, COCKATIELS, PARROTS, BUDGIES)

	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Water	Clear Revive	Calcibird	Vitaton 34	Clear Revive	Calcibird	Clear Lewerstim	Vitaton 34
Feed	Entero-Plus or Intestum	Protein Boost Aminovit-H	No medication	Entero-Plus or Intestum	Protein Boost Aminovit-H	Entero-Plus or Intestum	No medication

Recommended
Alternative or additional option

Important notes:

1. Plume Plus, B12 Elixer and Winning Tonic can be used to moisten grain before adding powders.
2. Bloedstim and Lewerstim can be added to the programme if desired.
3. All birds should be clear of worms. Deworm birds before breeding and every 6 months thereafter. Use Mediworm powder or Wormout gel.
4. It is important to use calcium supplements (Calcibird) before and during breeding.
5. The use of probiotics (Entero-Plus and Intestum) decreases the incidence of bowel disease, boosts immunity and leads to breeding more healthy young. These two products can be alternated but Intestum should not be used on the same day as Calcibird.
6. Give your birds a multivitamin and mineral supplement twice weekly (Aminovit-H and Vitaton 34).
7. It is advisable to use Intestum approx. 2 days before hatching and then everyday for 5 days after hatching.
8. In the event of a viral disease outbreak, Viroban can be used in the program, either in addition to the Vitaton 34 and Aminovit-H, or as a replacement of one of them.

MOULTING SEASON: VITAMIN SUPPLEMENT FOR CAGE BIRDS (i.e. CANARIES, COCKATIELS, PARROTS, BUDGIES)

	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Water	Premolt 5	Clear Revive	Premolt 5	Clear Vitaton 34	Premolt 5	Clear Revive	Vitaton 34
Feed	Entero-Plus or Intestum	Protein Boost Aminovit-H	No medication	Entero-Plus or Intestum	No Medication	Protein Boost Aminovit-H	No medication

Recommended
Alternative or additional option

Important notes:

1. Plume Plus, B12 Elixer or Winning Tonic can be used to moisten grain before adding powders.
2. Protein Boost, Premolt 5 and Plume-Plus are all used in the moulting season to ensure optimal feather nourishment as feathers consist mainly of protein.
